Shear Coupler & Shear Coupler Kit

- Replacement for all RAPCO new or overhauled 200, 240, and 400 series dry air pumps.
- See RASL-008 for recommended replacement interval. For installation eligibility - refer to your RAPCO dry air pump PMA Supplement. The Shear Coupler or Shear Coupler Kit must be installed an authorized mechanic.
- Shear coupler sold separately or in kit form including shear coupler, spline drive, and mounting gasket.

PN. RA03-002

Description: Shear shaft/coupler for RAPCO dry air pumps

PN. RA-SHEAR COUPLER KIT

Description: Shear shaft/coupler, spline drive, and mounting gasket

Dry Air Pump Caliper Inspection Kit

- Inspection kit measures dry air pump vane wear
- Complies with RASL-006

The RAPCO PN. RA-VAC MEASURE KIT is an inspection kit used to help determine when a dry air pump should be replaced. The kit comes with a caliper to measure vane wear, along with three extra cap screws and three extra lock washers, which are used to seal the inspection port found on all new RAPCO dry air pumps. This kit is designed to be used in compliance with RASL-006 or in the event one should lose the cap screw and/or lock washer during an inspection.
